

S7+ MODULE MICRO POWER AUDIO SOLUTIONS

Empowered by Qualcomm Snapdragon S7+ Chipsets

Our S7+ Module & Solution offers a variety of form factors, from module, PCBA and complete dongle & transmitter, with a new premium tier of audio performance. They feature advanced connectivity, including a Wi-Fi solution that extends audio device range beyond Bluetooth, supporting up to 192kHz lossless music streaming. Qualcomm on-device AI for enhanced ANC and sound personalization, with a new architecture that boasts a dedicated Micro NPU AI engine, multiple DSP cores, and increased memory. The S7+ supports micro-power Wi-Fi and seamless Bluetooth-to-Wi-Fi transitions for ultra-low power, high-quality audio experiences.

S7+ enables fresh new whole home and office coverage audio applications. We look forward to partnering with brand customers and ODMs to create customized, premium-quality audio applications.
